

SkyNRG, Fly Green Fund and Swedavia enable sustainable aviation fuel flights from Stockholm Arlanda Airport

Stockholm Arlanda Airport, January 3rd, 2017 – Just before New Year’s Eve, Swedavia received its first sustainable aviation fuel at Stockholm Arlanda Airport. It marks the start of deliveries of sustainable aviation fuel through the Fly Green Fund and demonstrates Swedavia’s commitment to sustainable aviation. The fuel is supplied by SkyNRG together with Air BP.

Fly Green Fund is the first of its kind in the world and enables organizations and individuals in the Nordics to reduce their carbon footprint, by flying on sustainable aviation fuel. Swedavia joined Fly Green Fund as launching partner two years ago and also became a corporate customer of Fly Green Fund. Swedavia is the first corporate in the world buying sustainable aviation fuel for all their business flights through Fly Green Fund. “We at Swedavia want to lead the way and help increase the demand for aviation biofuel,” says Lena Wennberg, Director Environment for Swedavia.

“It is a milestone in many ways for Fly Green Fund and our partners today. By buying sustainable aviation fuel for their staff flights, Swedavia reduces its own carbon footprint and contributes to developing a sustainable future for aviation. Other corporate customers like Löffbergs, Resia and our Swish-customers have contributed as well. We are grateful to everyone that has been part of this. It is a real joint effort and shows that together we can grow the sustainable aviation market in the Nordics. We have set an example for others to follow,” says Maria Fiskerud, Managing Director for Fly Green Fund.

SkyNRG organized the sustainable aviation fuel deliveries to Arlanda Airport for Fly Green Fund, in which now also SAS, KLM and EFS are partners. The sustainable aviation fuel is produced by biorefinery AltAir Fuels in the US and supplied by SkyNRG and Air BP via the common fuel infrastructure running to and at the airport.

“It is great to see that so much is happening in the Nordics. After founding the Fly Green Fund two years ago and after a lot of ground work, this is a huge result thanks to Swedavia. It is a good example that airports are perfectly positioned to support the development of sustainable aviation fuels,” says Theye Veen, CFO for SkyNRG.

About SkyNRG

SkyNRG is the global market leader for sustainable aviation fuel (SAF), having supplied over 25 airlines worldwide. SkyNRG sources, blends and distributes SAF, guarantees sustainability throughout the supply chain and helps to co-fund the premium. At the same time, SkyNRG focuses on developing regional supply chains that offer a real sustainable and affordable alternative to fossil fuels. SkyNRG

has its operations RSB certified and is structurally advised by an independent Sustainability Board in which the WWF International, Solidaridad and the Energy Academy Europe hold a seat. www.skynrg.com

About Fly Green Fund

The Fly Green Fund is a Nordic initiative founded by SkyNRG, NISA and Karlstad Airport, that enables organizations and individuals to reduce their carbon footprint by flying on sustainable aviation fuel. It aims to secure the necessary funding to kick-start the market for sustainable aviation fuel in the Nordics, by creating demand and at the same time supporting the development of production capacity from locally available feedstock. Swedavia, EFS, KLM, SAS and BRA are the funding partners for Fly Green Fund. The contributions from corporate customers, such as Löfbergs, Resia, Swedavia and Crip, and by private customers (Swish number: 123 131 4137) are used for 75% for sustainable aviation fuel supply and for 25% to support the production of sustainable aviation fuel in the Nordics. www.flygreenfund.se

About Swedavia

Swedavia is a State-owned group that owns, operates and develops ten airports across Sweden. Swedavia also owns Göteborg City Airport and is a minority owner in the company that operates the airport. Our role is to create the access Sweden needs to facilitate travel, business and meetings – in Sweden, in Europe and around the world. Safe, satisfied passengers are the foundation of our business. Swedavia is a world leader in developing airports with the least possible environmental impact. The Group has revenue of almost 5.5 billion Swedish kronor and some 2,500 employees. www.swedavia.se
